

Environmental Policy Statement

Cidon Construction Limited is a specialist company in the construction of concrete structures operating throughout the UK.

The Company recognizes its responsibilities to assess and minimize the impact of its business operations on the environment and to prevent pollution. We are committed to compliance with all legal and other relevant requirements in all our activities, and we strive for continuous improvement in all areas of our business.

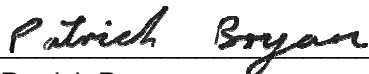

Site preparation and construction operations are closely monitored in conjunction with Local Authorities and Environmental Agencies. We aim to work closely with other teams and contractors to address issues arising from on-site activities, minimizing any disruption to local communities and encouraging efficiency.

In delivering these commitments we have established the following objectives:

- Minimize waste from our business operations.
- Work closely with our suppliers to ensure that care is taken in the selection of materials and products through regard for their environmental performance.
- Reduce the risk of accidental pollution from our construction operations.
- Ensure that we highlight environmental issues at the earliest opportunity, so that appropriate measures can be considered in line with best practice to avoid or minimize adverse environmental impact.
- Ensure that the employees of Cidon Construction Limited are educated in the role of responsibility required by them to maintain a high environmental awareness and performance.

Commitment of the Company to the above policy is signified below.

Signed

Patrick Bryan
Managing Director
