For the attention of Mr Ciaran Donnelly

Dear Sirs

**WP120 - Concrete Work
Performance of Cidon Construction Ltd**

I have recently had the pleasure of working with Cidon Construction Ltd. on a project within the campus of Ninewells Hospital in Dundee. Although the project was not large in monetary and physical size, it was complex in that the challenges were numerous and varied. It is fair to say that the design development was ongoing throughout the construction period, and the main access to the site was on the emergency access route to the Hospital itself. Cidon coped exceptionally well with the need to accommodate change, were more than helpful in limiting the financial implications of working in this manner and were quick to finalise their final account. In short, they built the job well, within their programmed duration and there were no disputes regarding the finances. Indeed, they were a pleasure to do business with. I would recommend this company to anyone looking for a concrete frame contractor. If any reference is required for Cidon Construction Ltd. please contact the writer.

Yours faithfully

Martin Young
